Holly has begun a crusade to increase awareness about sexual assault and safety by telling her story. She regards her speaking engagements as part of her healing process. She has become a highly sought after speaker and trainer. Holly is truly an advocate for victims rights!

Holly accepts speaking engagements to various groups and organizations for conferences, trainings, or other speaking events on an honorarium plus expenses basis.

Though Holly's life has been dramatically affected and changed by the attack, she prides herself on living as a survivor, not a victim.
